Product Description

The Take! Bottle program is launched. Capping system for bottles with drinks and take-out water. The first bail system for take-away drinks has already appeared in Poland. Although we hope that in the future it will cover all of Europe. Take! Bottle is to be an alternative to single-use bottles, especially plastic ones. The program assumes that a customer who takes a take-out drink in a bottle with the Take! Bottle logo will pay a PLN 1 deposit. He will be able to give it

back to any place that joins the program. Then he will receive the entire bail. 1. Take! Bottle will provide a map with the objects that joined the program. 2. For now, they confirmed that four premises have joined the program and "more are decided to cooperate". 3. In each big city ultimately 480 points to join. In the future, the program would be extended to other countries. 5. Take! Bottle provides various subscriptions. Bars can buy out for three to 18 months. A 12-month subscription costs PLN 149 per month. ADVANTAGES: • Premises changing habits from drinks in disposable packaging for reusable packaging would be a plus after selling the sixth bottle. • Everyone we talk to react positively and wants to join the system. The restaurant joining the program has a double benefit. First of all, it fits into the ecological trend, and secondly, it gets promotion in social media. • We would like to be part of the ecological trend, because a lot of resources are wasted, unnecessarily consumed. • Take! Bottle is made of glass. As the program creators assure, it is completely safe for health because it does not react with food. The bottle does not transfer taste or smell. It can be washed in a dishwasher. It can be used up to 500 times. After use, it can be processed. • Promotion of the premises, promotion of the local region and tourist attractions, • Reuse bottles in restaurants, bars or cafes to fill water, juices and other drinks made by service outlets. **Take Water History** passing through Germany, I bought water in a glass bottle with a printed view of the nearby so-called Castle of Snow White. I paid a deposit of a few euros and ... I did not return the bottle, I took it as a souvenir. I knew I could do it or return the bottle and get my deposit back. There is no problem with washing, electricity, water, etc. Is it ecological?
