Product Description

INGREDIENTS AND DESCRIPTION FUNCTIONAL DRINK AFTER PARTY works so well, because the osmotic properties of ingredients selected in it (containing the missing substances after drinking alcohol) are very similar to the osmotic properties of all body fluids. This fact ensures excellent absorption of osmotically active ingredients in the drink, ensuring improving the functioning and well-being of our body not only after drinking alcohol. The drink contains which enhances the metabolic processes L-glutamine,, supplying energy to glucose and a set of B vitamins and electrolytes such as calcium, potassium, sodium and magnesium necessary for proper functioning. L-glutamine - $[H_2N-CO-(CH_2)_2-CH(NH_2)-COOH]$ one of the amino acids naturally produced in our bodies. About 70% of the daily requirement for L-glutamine is produced by our body, the rest must be delivered with food. L-glutamine increases the level of concentration, stabilizes blood sugar levels, improves bowel function and strengthens the body's immunity. Glucose - $[C_6H_{12}O_6]$ the most easily absorbed by the human body simple sugar and the basic energy compound of most organisms. Alcohol causes a decrease in the level of glucose in the blood, which in turn leads to hypoglycaemia manifested by fatigue, trembling hands, and difficulty in maintaining balance. A set of B vitamins and calcium, potassium, sodium and magnesium - everything that the human body needs for the proper functioning of the nervous system and widely understood metabolism, and what it loses during alcohol consumption.
